## Technical Skills

---

**Programming:** Python, PHP, JavaScript, MySQL, HTML, CSS/Sass, Java, Bash

**Frameworks:** jQuery, Django, Wagtail, Bootstrap, Selenium

**Software / Tools:** Docker, Webpack, Photoshop, Illustrator, BrowserStack, Magento, AEM, SaltStack

## Experience

---

### *Schafer Condon Carter – Chicago, IL*

#### **Developer**

**January 2018–Present**

- Developed a boilerplate framework for building websites using the Wagtail CMS.
- Created a framework for frontend test automation using Python and Selenium WebDriver.
- Managed sites using Django, Wagtail, and Adobe Experience Manager.

### *Wheaton College Computer Science Department – Wheaton, IL*

#### **CS Configuration Management Intern**

**May 2017–November 2017**

- Implemented SaltStack as a configuration management system for the Computer Science lab.
- Collaborated with the Computer Science lab system administrator using git, Bitbucket, and Trello.
- Made contributions to the SaltStack open source project on GitHub.

### *Wheaton College Academic and Institutional Technology – Wheaton, IL*

#### **Student Tech Supervisor**

**January 2017–August 2017**

- Responsible for supervising and assisting student techs at the IT service desk.
- Provided training for newer student techs on troubleshooting and office procedures.

#### **IT Developer**

**September 2016–August 2017**

- Created a dashboard web application to display system statuses, messages, and appointments.
- Developed scripts to automate support procedures commonly performed by service desk techs.

### *Wheaton College Buswell Memorial Library – Wheaton, IL*

#### **Web Application Developer**

**August 2016–January 2018**

- Created responsive web applications using HTML, CSS/Sass, Bootstrap, JavaScript, and jQuery.
- Used PHP, MySQL, and Apache for backend development and Ajax to coordinate with frontend.

#### **Software Deployment Intern**

**May 2015–August 2015**

- Packaged and deployed software for automated installation on college-owned computers.
- Managed campus computers using Microsoft System Center Configuration Manager 2012.

#### **IT Support Technician**

**October 2014–January 2017**

- Provided technical support for faculty and students over the phone, through email, and in person.
- Worked with clients to troubleshoot and resolve hardware, software, and network issues.
