Experience

Wheaton College Buswell Memorial Library – Wheaton, IL

Web Application Developer   **August 2016–Present**
- Created responsive web applications using HTML, CSS/Sass, Bootstrap, JavaScript, and jQuery.
- Used PHP, MySQL, and Apache for backend development and Ajax to coordinate with frontend.
- Contributed to the open source project for the library's electronic resource management system.

Wheaton College Computer Science Department – Wheaton, IL

CS Configuration Management Intern   **May 2017–November 2017**
- Implemented SaltStack as a configuration management system for the Computer Science lab.
- Collaborated with the Computer Science lab system administrator using git, Bitbucket, and Trello.
- Made contributions to the SaltStack open source project on GitHub.

Wheaton College Academic and Institutional Technology – Wheaton, IL

Student Tech Supervisor   **January 2017–August 2017**
- Responsible for supervising and assisting student techs at the IT service desk.
- Provided training for newer student techs on troubleshooting and office procedures.

IT Developer   **September 2016–August 2017**
- Created a dashboard web application to display system statuses, messages, and appointments.
- Developed scripts to automate support procedures commonly performed by service desk techs.
- Integrated the support scripts with the service desk's remote desktop software.

Software Deployment Intern   **May 2015–August 2015**
- Packaged and deployed software for automated installation on college-owned computers.
- Managed campus computers using Microsoft System Center Configuration Manager 2012.

IT Support Technician   **October 2014–January 2017**
- Provided technical support for faculty and students over the phone, through email, and in person.
- Worked with clients to troubleshoot and resolve hardware, software, and network issues.
